EXECUTIVE SUMMARY

One platform. The complete home journey.

NyumbaSearch connects people to homes while helping property businesses acquire tenants, manage properties and access trusted home services.

0 **DISCOVER**

1 Map · location · budget · property type · neighbourhood

0 **VERIFY**

2 Owner/listing verification · property validation · reviews · risk signals

0 **MANAGE**

3 Tenant portal · rent tracking · payments · leases · invoices · maintenance

0 **SERVE**

4 Movers · cleaners · repairs · security · solar · interior services

From discovery to move-in and beyond.

THE PROBLEM

Housing discovery is fragmented. Trust is expensive.

01 Discovery is fragmented

- Agents · social media · classifieds · WhatsApp · property sites
- Information is inconsistent across channels

02 Trust is expensive

- Time · transport · effort visiting unavailable listings
- Inaccurate or poorly represented properties

03 The journey ends too early

- Most platforms stop at the listing
- Tenancy · rent · management · services not connected

04 Owners lack modern tools

- Lead management · tenant records · rent tracking
- Maintenance workflows · portfolio visibility

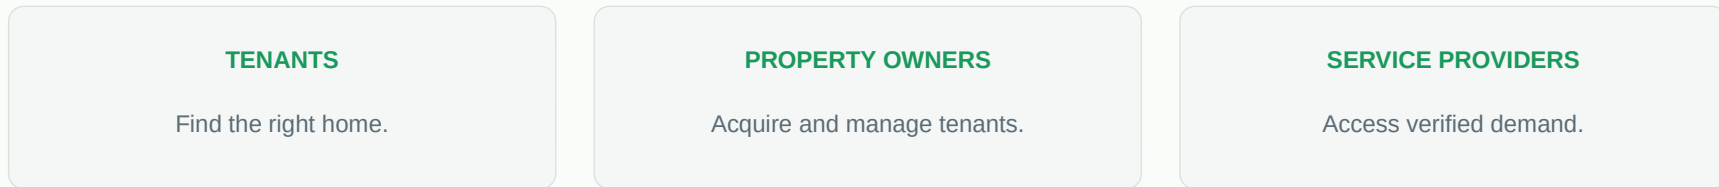

Own the user relationship before, during and after the move.

OUR SOLUTION

A trusted operating layer for the entire home journey

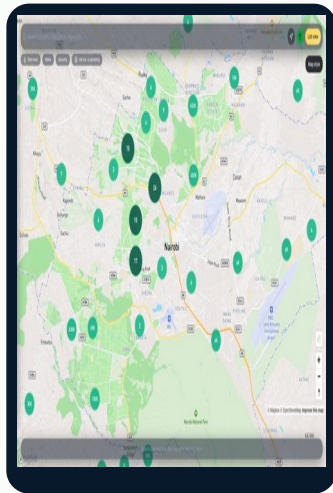

One relationship. Multiple high-value touchpoints.

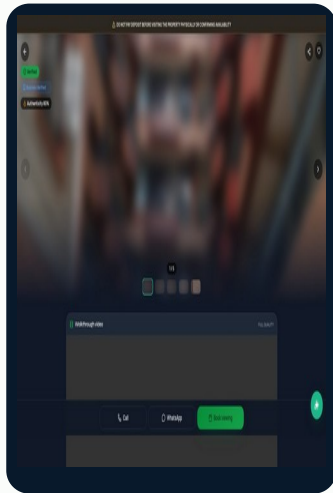

PRODUCT
